Digitalisation made easy

- Use **HorschConnect** and lay the basis for the digitalisation of your machine.
- From controlling the machine via smartphone to recording and processing telemetry data.
- With regard to hardware, you only need the HORSCH SmartCan that is equipped with most of the different technologies and interfaces.
- The system is available for different technologies in the seed drill, crop care and Maestro sector.

Saves time and nerves: HorschConnect Telematics

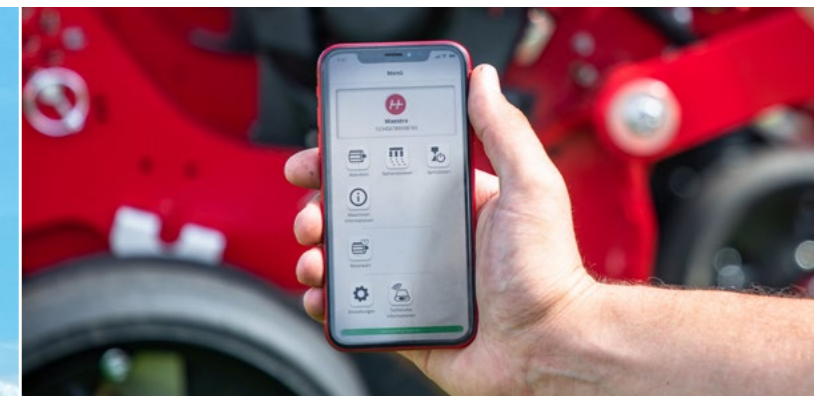

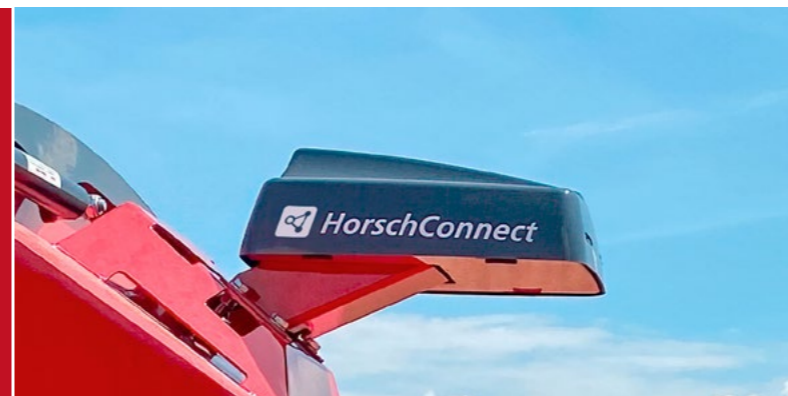

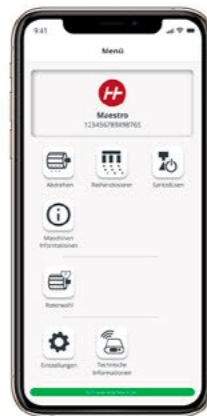

- Always an eye on the machine:
 - Live insight, historical view and automatic documentation of all relevant data, e. g. position, operational speed and the application rate of all components
 - Monitoring of the work quality (e. g. singulation quality of the Maestro or nozzle monitoring in the crop care sector)
 - Proactive and targeted service due to remote error access
- Push notifications via smartphone or e-mail in case of defined error messages
- Automated analysis of the machine performance (e. g. hectare output) for individual machines as well as for the fleet management
- Portal and machine insights can be accessed by several users

You use your smartphone for so many things? Why don't you use it for operating your machine? For more comfort and flexibility

- Calibration, row metering device, nozzle test and co.: intuitive handling of selected machine functions via smartphone
- Always the perfect choice: Use our interactive tools to take the perfect decision whenever you want to, e. g. regarding the rotor selection.
- Read out information and error messages easily at the smartphone and send by mail.
- Available for iOS and Android
- Simple connection via the WLAN of the machine

The handling is simple:

- Download the MobileControl app in the App Store respectively Google Play Store
- Connection is established with the local machine WLAN: either via the WLAN settings of our smartphone or by scanning the QR code at the terminal
- **Simply use the different functions of the app!**

HorschConnect

HorschConnect MobileControl

“For us, the basis for the next development steps is the connection of all machines to the internet. If this has been realised, the bunch of new possibilities and function can begin to grow.”

PHILIPP HORSCH
Managing director
